

# TCGA-HNSC

## Summary

The Cancer Genome Atlas Head-Neck Squamous Cell Carcinoma (TCGA-HNSC) data collection is part of a larger effort to build a research community focused on connecting cancer phenotypes to genotypes by providing clinical images matched to subjects from [The Cancer Genome Atlas \(TCGA\)](#). Clinical, genetic, and pathological data resides in the [Genomic Data Commons \(GDC\) Data Portal](#) while the radiological data is stored on The Cancer Imaging Archive (TCIA).

Matched TCGA patient identifiers allow researchers to explore the TCGA/TCIA databases for correlations between tissue genotype, radiological phenotype and patient outcomes. Tissues for TCGA were collected from many sites all over the world in order to reach their accrual targets, usually around 500 specimens per cancer type. For this reason the image data sets are also extremely heterogeneous in terms of scanner modalities, manufacturers and acquisition protocols. In most cases the images were acquired as part of routine care and not as part of a controlled research study or clinical trial.

## CIP TCGA Radiology Initiative

Imaging Source Site (ISS) Groups are being populated and governed by participants from institutions that have provided imaging data to the archive for a given cancer type. Modeled after TCGA analysis groups, ISS groups are given the opportunity to publish a marker paper for a given cancer type per the guidelines in the table above. This opportunity will generate increased participation in building these multi-institutional data sets as they become an open community resource. Learn more about the [TCGA Head-Neck Phenotype Research Group](#).

## Acknowledgements

We would like to acknowledge the individuals and institutions that have provided data for this collection:

- Ontario Cancer Institute/University Health Network, Toronto, Ontario - Special thanks to **Fei-Fei Liu (MD)**, **Kenneth Yip (Ph.D.)**, **Katrina Rey-McIntyre (BSc.)**, **Scott Bratman (MD, Ph.D.)** and **John Waldron (MD, MSc.)**.
- University of Pittsburgh/UPMC, Pittsburgh, PA - Special thanks to **Margrita L Zuley, MD** and **Rose Jarosz**.
- University of North Carolina, Chapel Hill, NC - Special thanks to **J. Keith Smith, MD, Ph.D.** and **Shanah Kirk** from the Department of Radiology.
- MD Anderson Cancer Center, Houston TX - Special thanks to **Rivka Colen, MD**, **Kimberly Garcia**, and **Bowman Willams**.
- Vanderbilt University Medical Center, Nashville TN - Special thanks to **Dominique Delbeke, MD, Ph.D.** and **Michelle Pham**.
- Johns Hopkins University - Special thanks to **Paul Nagy, PhD, FSIIM** and **Gorkem Sevinc**
- University of Miami, Miller School of Medicine- Special thanks to **Jose M. Net, MD**
- Barretos Cancer Hospital, Barretos, São Paulo, Brazil – Special Thanks to **Fabiano Rubião Lucchesi, MD** and **Natália Del Angelo Aredes**.

## Data Access

Click the **Download** button to save a ".tcia" manifest file to your computer, which you must open with the [NBIA Data Retriever](#). Click the **Search** button to open our Data Portal, where you can browse the data collection and/or download a subset of its contents.

| Data Type                 | Download all or Query/Filter  |
|---------------------------|---|
| Images (DICOM, 130GB)     |   |
| Tissue Slide Images (web) |    |
| Clinical Data (TXT)       |    |
| Genomics (web)            |    |

Click the Versions tab for more info about data releases.
