

# TCGA Head-Neck Phenotype Research Group

# Summary

The Cancer Genome Atlas (TCGA) Head-Neck Phenotype Research Group is part of the [Cancer Imaging Project TCGA Radiology Initiative](#); an effort to build a research community focused on connecting cancer phenotypes to genotypes by providing clinical images matched to tissue specimens analyzed for [The Cancer Genome Atlas \(TCGA\)](#).

Imaging Source Site (ISS) Groups are being formed and governed by participants from institutions that have provided imaging data to the archive for a given cancer type. Modeled after TCGA analysis groups, ISS groups are given the opportunity to publish a marker paper for a given cancer type per the guidelines in the table above. This opportunity will generate increased participation in building these multi-institutional data sets as they become an open community resource. Current [TCGA-HNSC](#) source sites include:

- University of Pittsburgh (UPMC) (TSS code "-CN-")
- University of North Carolina (TSS code "-BA-")
- Vanderbilt (TSS code "-CR-")
- MD Anderson (TSS code "-CV-")
- Johns Hopkins University (TSS code "-BB-")

Please contact us at [help@cancerimagingarchive.net](mailto:help@cancerimagingarchive.net) if you have scientific questions or are interested in collaborating with their group.

# Publications

## TCGA Head-Neck Phenotype Research Group Publications

- Manuscripts written by the group will be listed here as they are published.

Publications written by other members of the research community can be found on our [TCIA Publications](#) page. Please contact us at [help@cancerimagingarchive.net](mailto:help@cancerimagingarchive.net) if you have a publication you would like us to add.

## TCGA Genomics Publications

[Read the paper about the TCGA-HNSC genomic study in the journal Proceedings of the National Academy of Sciences](#). Additional TCGA publications can be found at: <http://cancergenome.nih.gov/publications>.

## Publication Policies

Per TCGA and TCIA Guidelines, formal permission requests are no longer required to submit publications using TCGA-HNSC data. Please see the following links for more information about the freedom-to-publish criteria for these data sets:

Data Source	Status
<a href="#">TCGA Data Portal Publication Guidelines</a>	No restrictions; all data available without limitations.
<a href="#">TCIA Data Usage Policies and Restrictions</a>	No restrictions; all data available without limitations.

Please contact us at [help@cancerimagingarchive.net](mailto:help@cancerimagingarchive.net) if you have any questions about these policies.
