

QIN multi-site collection of Lung CT data with Nodule Segmentations

Description

This dataset (also known as the "moist run" among QIN sites) contains CT images (41 total scans) of non-small cell lung cancer from: the Reference Image Database to Evaluate Therapy Response (RIDER), the Lung Image Database Consortium (LIDC), patients from Stanford University Medical Center and the Moffitt Cancer Center, and the Columbia University/FDA Phantom. In addition, 3 academic institutions (Columbia, Stanford, Moffitt-USF) each ran their own segmentation algorithm on a total of 52 tumor volumes. Segmentations were performed 3 different times with different initial conditions, resulting in 9 segmentations formatted as DICOM Segmentation Objects (DSOs) for each tumor volume, for a total of 468 segmentations. This collection may be useful for designing and comparing competing segmentation algorithms, for establishing acceptable ranges of variability in volume and segmentation borders, and for developing algorithms for creating cancer biomarkers from features computed from the segmented tumors and their environments.

Data Access

Data Access

Click the **Download** button to save a ".tcia" manifest file to your computer, which you must open with the [NBIA Data Retriever](#)

Data Type	Download all or Query/Filter
CT Images - 31 series (DICOM)	
Segmentations - 378 series (DICOM)	
CT Images & Segmetations Combined - 409 series (DICOM)	

Please contact help@cancerimagingarchive.net with any questions regarding usage.

Detailed Description

Detailed Description

Current version spreadsheets:

- Nodule Location Documentation (spreadsheets)
 - [Lung Phantom Nodule Locations](#)
 - [QIN Lung Nodule Locations](#)
 - [RIDER Lung CT Nodule Locations](#)
 - [LIDC-IDRI Nodule Locations](#)

Previous version spreadsheets:

- Nodule Location Documentation (spreadsheets)
 - [Lung Phantom Nodule Locations](#)
 - [QIN Lung Nodule Locations](#)
 - [RIDER Lung CT Nodule Locations](#)
 - [NSCLC Radiogenomics Nodule Locations](#)
 - [LIDC-IDRI Nodule Locations](#)

For more information on versioning, please refer to the Versions tab.

Versions

Version 3 (Current): 2018/12/18

Data Type	Download all or Query/Filter
CT Images - 31 series (DICOM)	
Segmentations - 378 series (DICOM)	
CT Images & Segmetations Combined - 409 series (DICOM)	

Note: In December 2018 it was discovered that an update to [NSCLC Radiogenomics](#) mistakenly resulted in the deletion of the segmentation data for this analysis set. We are currently investigating whether it is possible to restore the data. In the meantime this dataset can be downloaded using the links above which exclude the Stanford NSCLC Radiogenomics subset of the analyses.

Version 2: 2015/12/21

Data Type	Download all or Query/Filter
CT Images - 31 series (DICOM)	
Segmentations - 378 series (DICOM)	
CT Images & Segmetations Combined - 409 series (DICOM)	

Version 1: 2015/09/15

On 9/14/2015 this DOI was updated to resolve problems with 9 of the segmentations being incorrectly labeled. The Series Instance UIDs in the original data set which have since been deleted from TCIA are:

1.2.276.0.7230010.3.1.3.0.34323.1424694723.968333
