

C_NMC_2019 Dataset: ALL Challenge dataset of ISBI 2019

Summary

Acute lymphoblastic leukemia (ALL) constitutes approximately 25% of the pediatric cancers. In general, the task of identifying immature leukemic blasts from normal cells under the microscope is challenging because morphologically the images of the two cells appear similar.

Challenge is split into 3 separate phases:

- **Train set composition:**

Total subjects: 73, ALL (cancer): 47, Normal: 26

Total cell images: 10,661, ALL(cancer): 7272, Normal: 3389

- **Preliminary test set composition:**

Total subjects: 28, ALL (cancer): 13, Normal: 15

Total cell images: 1867, ALL(cancer): 1219, Normal: 648

- **Final test set composition:**

Total subjects: 17, ALL (cancer): 9, Normal: 8

Total cell images: 2586

Detailed Description

Detailed Description

Image Statistics	
Modalities	Pathology
Number of Participants	118
Number of Studies	118
Number of Images	15,135
Images Size (GB)	10.44
