

# To View Pathology-Slide data from NLST

From a TCIA user:

I am having difficulty opening the images in the nlst-path folder that are in format \*.SVS do you know of any program in windows or linux that opens these images?

## Answer:

- 1) My understanding is that Aperio Imagescope software is free and can view the .SVS files. <http://www.leicabiosystems.com/digital-pathology/digital-pathology-management/imagescope/>
- 2) <https://wiki.cancerimagingarchive.net/display/NLST/NLST+Pathology> suggests you can use caMicroscope to view the slides in a linked-way to the DICOM; Here is a page that might help you get going with that: <https://wiki.nci.nih.gov/display/CTIIP/Digital+Pathology+and+Integrative+Query+System+Documentation>
