

TCGA Glioma Phenotype Research Group

Summary

The Cancer Genome Atlas (TCGA) Glioma Phenotype Research Group is part of the [Cancer Imaging Project TCGA Radiology Initiative](#); an effort to build a research community focused on connecting cancer phenotypes to genotypes by providing clinical images matched to tissue specimens analyzed for [The Cancer Genome Atlas \(TCGA\)](#).

Imaging Source Site (ISS) Groups are being formed and governed by participants from institutions that have provided imaging data to the archive for a given cancer type. Modeled after TCGA analysis groups, ISS groups are given the opportunity to publish a marker paper for a given cancer type per the guidelines in the table above. This opportunity will generate increased participation in building these multi-institutional data sets as they become an open community resource. Current [The Cancer Genome Atlas Glioblastoma Multiforme Collection \(TCGA-GBM\)](#) (glioblastoma) and [The Cancer Genome Atlas Low Grade Glioma Collection \(TCGA-LGG\)](#) (low grade glioma) source sites include:

- Thomas Jefferson University
- Henry Ford Hospital
- University of California, San Francisco
- MD Anderson Cancer Center
- Emory University
- Mayo Clinic
- Case Western Reserve University School of Medicine

A number of other collaborators have also been invited to join the group by its members. Please contact Adam Flanders (adam.flanders@jefferson.edu) if you have scientific questions for TCGA-GBM/LGG ISS or if you are interested in collaborating with their group.

Publications

Publications written by other members of the research community can be found on our [TCIA Publications](#) page. Please contact us at help@cancerimagingarchive.net if you have a publication you would like us to add.

TCGA Genomics Publications

Read the [2008 Nature paper](#) and [2013 Cell paper](#) to learn more about the GBM genomic study. Read the [New England Journal of Medicine LGG paper](#) to learn more about the LGG genomic study. Additional TCGA publications can be found at: <http://cancergenome.nih.gov/publications>.

Publication Policies

Per TCGA and TCIA Guidelines, formal permission requests are no longer required to submit publications using TCGA-GBM or TCGA-LGG data. Please see the following links for more information about the freedom-to-publish criteria for these data sets:

Data Source	Status
TCGA Data Portal Publication Guidelines	No restrictions; all data available without limitations.
TCIA Data Usage Policies and Restrictions	No restrictions; all data available without limitations.

Please contact us at help@cancerimagingarchive.net if you have any questions about these policies.
